**Bulk Seed  
TENDER GUIDE**

**Seed Express**

Handling small or large amounts of bulk seed and/or fertilizer is easier, quicker and safer with Meridian's Seed Express.

Meridian's Seed Express tenders are designed for farmers and agro-retailers who typically handle and transport seed in mini-bulk bags, seed boxes or from a bulk seed facility.

**THE SEED EXPRESS 240RT™** has dual compartments with a bulk holding capacity of 192 bushels and is covered with the Agri-Cover™ roll tarp system. The 240RT™ can function as a weigh wagon during the harvest season.

**NEW FOR 2011** Meridian's advanced control system with hydraulic drive to adjust discharge height, pivot conveyor to left or right, gate opening and the conveyor drive system.

**Wireless Remote Control**  
All this from the convenience of a wireless remote control.

An optional electronic scale system for the 240 and 375 models takes the guess work out of your planting season, placing equal amounts of seed in your planter seed boxes or central seed tank.

**Seed Commodities**  
The Seed Express works great for handling commodities like corn, beans, rice, peanuts, cotton, wheat, and oats.

**THE SEED EXPRESS 375RT™** has a total bulk capacity of 300 bushels in its dual compartments, is covered with the Agri-Cover™ roll tarp system and includes the T21000ST trailer in the RT package. The 375RT also doubles as a larger weigh wagon during harvest.

**THE SEED EXPRESS 600RT™** is very effective at reducing your physical work load and the time it takes to fill your seed tank, helping you work smarter and much faster so you can spend more hours a day seeding. The 600RT™ was designed for farmers planting small grains with air seeders, who typically incorporate fertilizer with their seed at planting time. However, the 600RT is very versatile and with three independent compartments, can be utilized for farming operations using multiple seed varieties or more than one blend of fertilizer. The fully open top design of the 600RT allows for easy filling and the roll tarp is operated from the ground to cover and protect your products. The advanced wireless remote system has many functions including opening and closing each compartment and controlling the conveyor functions. A light panel displays which compartment is open while you effortlessly control the system from your air seeder or equipment.

**MERIDIAN MANUFACTURING GROUP**

Meridian Manufacturing Group is proud to be the innovator of the all-welded, smooth-wall hopper bin. Beginning in 1965 with the first hopper bin design, Meridian has launched many innovations and design changes over the years, each advancing and improving the hopper bin experience.

Meridian's best references are the thousands of customers who have experienced Meridian Built hopper bins and completely trust them for their most valued products: seed, feed, fertilizer and even crops at harvest. Meridian is the largest manufacturer of smooth-wall hopper bins and bulk seed tenders with offices and manufacturing facilities in Storm Lake, Iowa, Camrose and Lethbridge, Alberta and Winkler, Manitoba.

# Bulk Seed Tenders

Changing from bags to bulk is made easy with any of Meridian's Seed Tenders, including the compact BST.

## THE BULK SEED TENDER 110®

is built for the farmer who plants approximately 500 acres and for retailer rental use. The 110 BST has a compact design and can easily be loaded into a truck box if you choose not to purchase the T6000ST trailer.

### Seed Commodities

The Bulk Seed Tender 110 and 220 works great for handling commodities like corn, beans, wheat, and oats.

## THE BULK SEED TENDER 220®

is built for the farmer who plants up to 750 acres. This unit is equipped with two compartments, holding enough seed to keep you in the field for most of the day. This model works great as a tender for planters with individual seed boxes. An On/Off switch is located at the end of the downspout making it easy to control the seed flow while moving from one seed box to the next.

# Seed Titans

Filling your planter is much easier and quicker with Meridian's Titan seed tenders.

## THE SEED TITAN 2™

is designed to hold two 50 unit seed boxes. This tender has a low profile design and is equipped with Poly-cup auger flighting. The Titan 2 tender functions very well for filling individual seed boxes in any planter.

## THE SEED TITAN 2SE

is also designed for two 50 unit seed boxes but is equipped with a cleated belt conveyor allowing for higher volume of seed transfer at a reduced speed. Meridian's Titan 2™ makes it easy to fill individual planter boxes or your central seed tank.

### Seed Commodities

The Seed Titan series work great for handling commodities like corn, beans, wheat, and oats.

## THE SEED TITAN 4SE™

is designed for the larger farm operations and holds four 50 unit seed boxes, giving the flexibility of taking up to four different seeds varieties to the field. The cleated belt conveyor ensures a higher volume of seed transfer at a reduced speed while filling individual seed boxes or a central seed tank. The TITAN 4SE™ can be equipped with an optional scale kit.

### SEEDMAX BULK STORAGE SYSTEM

If your expanding an existing seed business or considering a new seed facility, it's important to consider Meridian's experience and expertise in bulk seed storage. The SEEDMAX bulk seed bins are smooth-wall hopper bins designed and manufactured by Meridian specifically to provide you the safest and most efficient storage and handling solution for your seed. They are available in sizes ranging from 500 to 5,000 bushels and installed by trained Meridian dealers in a variety of configurations. Insist on Meridian built and experience the advantages.
